

Charging Instructions:

A red light will turn on when your device is plugged into the charger. When it is fully charged, the light will turn green. Fully charge GAGS with included USB-C Charger for 1.5 - 2 hours.

Cleaning

Take apart the unit completely for cleaning. First, remove the glass cup. Next, remove the airflow silicone from the glass. Lastly, remove the atomizer or cartridge from the 510 connection, and unscrew 510 connection from the base. Glass: Wipe with an alcohol wipe until all the residue has been removed. Silicone Parts, 510 Connection, Base: Use an alcohol wipe or a cotton swab and 91% alcohol to clean off the build up on all of the silicone parts and 510 connection. Use a cotton swab and 91% alcohol to clean any buildup beneath the 510 connection.

Warranty

Your purchase of the GAGS includes a lifetime warranty on all its parts. Each GAGS is hand tested in our US warehouse before shipping to ensure quality. Be sure to scratch and scan the QR code located on the box of this device to collect rewards and activate your warranty. This lifetime warranty applies to customers within the United States only. Please contact us directly at support@thekindpen.com if you are outside of the US.

Thank you for purchasing The Kind Pen. #be kind and take it EZ. #For more information, please visit thekindpen.com

GAGS

User Manual

Introduction

Installation

The GAGS is a dual use vaporizer for concentrates and 510 cartridge. For concentrates use: Load a small amount of concentrates into the included triple quartz rod atomizer or ceramic disk atomizer. About a half grain of rice is all that is needed; be sure not to overfill the atomizer. Screw it into the 510 connection. For 510 cartridge use: Screw your prefilled 510 cartridge into the 510 connection. The light around the base will flash the current voltage to show a successful connection has been made if the GAGS is already on. Place the glass cup on top.

How to Use

Power On/Off: Tap the power button 5 times quickly to turn on/off. The indicator light will flash 5 times to indicate that your device is turning on/off. **Variable Voltage:** The GAGS has 4 temperature settings: 2.5V (Yellow) / 3.0V (Blue) / 3.5V (Green) / 4.0V (Red). You can change voltage by tap the power button 3 times quickly. **Dual Working Modes:** Regular mode: Simply tap and hold the power button. The longer you hold, the more vapor will be created. Sesh mode: Tap the power button two times quickly to activate a two-minute continuous heating period, without needing to hold the button.
